SKILLS

Programming: Python, C++, **DSA (500+350 problems solved on Leetcode and Coding Ninjas)**, SQL
AI/ML: Agentic AI, RAG, Transformers, Training/Finetuning, Object Detection, NLP, Computer Vision, MLOps
Frameworks: Langchain/Langgraph, Pytorch, FastAPI, Flask, Scikit-learn, Numpy, Pandas
Cloud & Tools: MCP, AWS, Azure, Databricks, Docker/Kubernetes, CI/CD, MLFlow

EXPERIENCE

- Clarivate** May 2025 – Present
Associate Data Scientist Noida
- Built an end-to-end **Text-to-SQL** based **Agentic Chatbot** for 10k+ users.
 - Worked with **Langchain/Langgraph**, MLflow, FastAPI and **Azure OpenAI** Studio for development. Used DeepEval, Promptfoo and Ragas to make tiered evaluation pipelines for Agentic and **RAG** applications.
 - Utilized **MCP** servers, **AWS ECS** on fargate for deployment, **Bedrock Guardrails** for security, **Redshift** for data warehousing and Aurora **Postgres** for stateful session storage, managed **CI/CD** with github actions.
 - This chatbot led to an **increase in user involvement by 150%** for the entire product, and **significant increase in revenue**.
 - Worked with the product AI Classifier, utilized **AWS SageMaker** for finetuning and inference of **Bert** models for hierarchical classification, **AWS Step-functions** for orchestration, **Lambda**, **SQS** and more.
 - Improved **ETL** pipelines for user provided training datasets, which **reduced overfitting** led to an **8% increase in test accuracy**.
- Monotype** Aug 2024 - May 2025
AI/ML Trainee Noida
- Researched, built, and deployed GenAI models, including Diffusion models, GANs, and Transformers, using **PyTorch**, FastAPI, Docker, and cloud platforms (AWS/Azure).
 - Developed **BERT-Diffusion** for font generation, experimented with CLIP, **reducing design time by 30%**.
 - Built a three-stage diffusion model for Japanese fonts, **achieving 94% IoU** (15% improvement).
- Greentech ITS LLP** Apr 2024 - May 2024
Computer Vision Intern Delhi
- Worked on **Automatic Number Plate Recognition (ANPR)** and Abandoned **Object Detection** using YOLOv8, YOLO-NAS, and DeepSort. Improving accuracy from **85% to 93%**
 - Optimized model inference with TensorRT and ONNX, making it **4x faster** (4it/s to 1it/s).

PROJECTS

- Multimodal Vision-Language Model (PaliGemma) | PyTorch, Flask** 2024
- Built a **state-of-the-art vision-language model** for advanced image-based question answering from scratch.
- Chest Cancer Detection WebApp | TensorFlow, CNNs, MLflow, Docker, Flask, AWS** 2023
- Developed a **high-precision (95%) tumor detection model** for medical applications.
 - Implemented an ML pipeline with MLflow for model monitoring and comparison, deploy on AWS via CI/CD.

CERTIFICATIONS

- AWS Certified AI Practitioner** 2026
Amazon Web Services

EDUCATION

- Jaypee Institute Of Information Technology** 2020 – 2024
Bachelor of Technology in Computer Science and Engineering
- Bal Bharti Public School** 2018 – 2020
Higher Secondary, CBSE
